# PYTHON PATHS: ABSOLUTE PATH

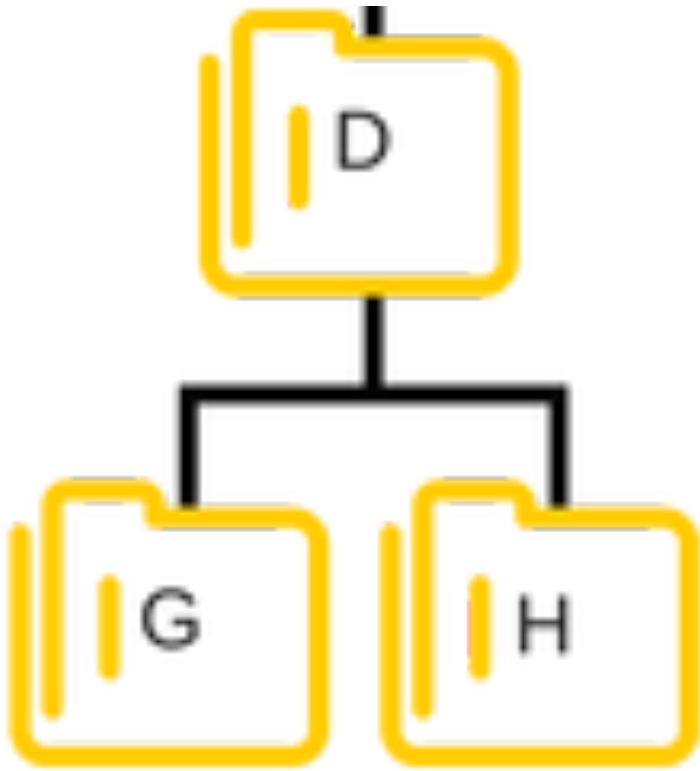

To get to a file in H:

/A/D/H

On the board, draw out the path to your Dropbox folder and Slack me a photo

PYTHON PATHS: RELATIVE PATH

- Python often already starts in file D which is known as its **directory**

  To get to a file in H: /H

- To check the path to our directory, we can use the os module:

  import os

  os.getcwd(): shows you the directory

  os.listdir(): lists out the files in the directory

  os.chdir(): changes path of directory

os   .   getcwd()

D   /   H
